

Investment in legal research

2020 key Westlaw® Edge enhancements

We continue to invest in Westlaw Edge to deliver the most advanced tools to help you complete your research even faster and with total confidence.

New intelligent document analysis tools in Quick Check

Quick Check Judicial

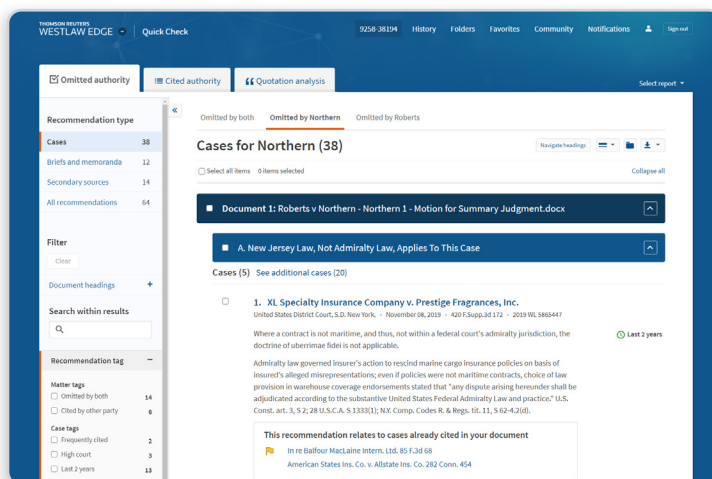

Research more confidently without compromising accuracy with Quick Check Judicial. Quick Check Judicial allows you to upload multiple documents from a single matter to gain an inside look at the same analysis your judge will see, including what was omitted, a list of citations found in the uploaded documents, and any differences between case quotes and the cited case language on Westlaw Edge.

Quick Check Quotation Analysis

Ensure your work is error free and spot inaccuracies in your opponent's arguments with Quick Check Quotation Analysis. Quotation Analysis uncovers discrepancies between case quotes and the cited case language on Westlaw Edge, and provides crucial context needed to easily see when quotes have been taken too much out of context.

Quick Check content expansion

Quick Check now identifies Lexis citations, and expanded warnings for cited authority and table of authority tabs to include trial court orders and statutes and regulations.

Quick Check Judicial reveals the same analysis your judge will see.

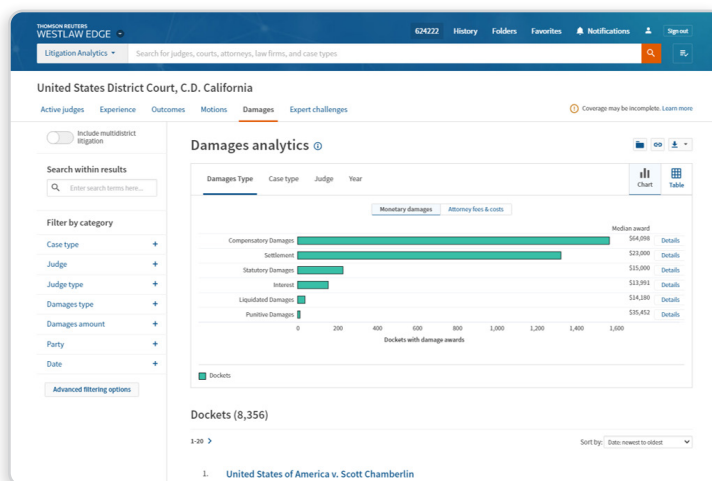

More data driven insights with Litigation Analytics

Damages in Litigation Analytics

Quickly assess and value litigation with Damages in Litigation Analytics. Whether you're looking to determine cost-benefit analysis of taking on a case, settlement negotiation approach, or possible client risks, Damages will help determine the best course of action.

More Litigation Analytics enhancements

- **New active judges page:** Understand the context of your judge compared to the court average, and compare any two judges
- **New judge overview page:** Highlights for your judge related to which party they typically rule in favor of, time to rule, case type experience, and more
- **Attorney overview page:** See your opposing counsel's case type and court experience, motion practice, grant rates, and recent activity
- **Law firm overview page:** Highlight your firm's experience and success rate or evaluate the experience of outside or opposing counsel with relevant law firm information including motion success, grant rates, and recent activity
- **New case types:** Expanded case type coverage including Public Health Emergencies and Civil Rights
- **Better transparency:** Easily toggle between state and federal analytics separately

Assess and value litigation with insights from Damages.

Additional enhancements

Legislative Insights powered by Skopos Labs®

Stay on top of proposed federal legislation that could impact your client, company, or agency and be a more effective advocate with Legislative Insights. Legislative Insights assigns a probability of enactment score to proposed federal legislation, tags relevant industries that are likely to be impacted if a bill is passed, and shows the status of the bill as it works its way through congress.

Compare Text

Better understand how proposed legislation may impact the law or how codes may differ across jurisdictions with Compare Text which allows you to select a snippet of text from any two Westlaw Edge documents to compare similarities and differences.

Enhancements to Folders

New intuitive folders allow you to create and share notes, export, rename, or delete items. You can also quickly access your folders with the option to pin your most used documents.

Dockets Timeline

Add greater efficiency to your research and limit the need to page through dockets to find key litigation events with the new Timeline tab in dockets.

WestSearch® Plus enhancements

- Expanded secondary source answers
- Use up to 4,000 characters, plus Boolean Terms and Connectors or Plain Language Searches
- You can now search within your results list up to 10 times to narrow in on what matters most

Intellectual Property enhancements

- **Trademark Image Search:** Upload an image to see what visually similar images may already be registered in the market. Additionally, search by image to know if someone is registering a trademark like an existing trademarked image.
- **Trademark Prosecution Data:** Navigate to the new File History (TSDR) tab to follow the status of U.S. federal trademark applications from an easy-to-use interface.
- **U.S. Patent and Application Drawings:** Easily identify documents that are relevant to your search by seeing drawings directly in the search results or displayed in the Drawings tab.

A look back at key 2019 enhancements

- **Quick Check:** An intelligent document analysis tool that securely analyzes your or your opponent's brief to identify recommendations that are highly relevant to the issues in the input document, but not otherwise cited.
- **Precedent Analytics:** Harness the power of the Key Number System to quickly narrow in on a topic and easily find what citations, other judges, and jurisdictions your particular judge relies upon when drafting their opinions.
- **Jurisdictional Surveys:** Quickly retrieve a customized compilation of laws across all U.S. jurisdictions on virtually any topic. Simply start with a citation of a statute, index term, or from a predefined topic. Jurisdictional Surveys account for your search term and the variances in terminology, so you can avoid having to construct the perfect search query.
- **Select Highlighting:** Zero in on the cases that contain the most critical terms and phrases in your search query by adding term colors to your search results.
